BACK TO SCHOOL

Back to school safely, guidance for parents and carers

Parental responsibility

Taking care of health, wellness and education of a child is natural for a family. But today it is even more important to be on guard: every day, especially before your child leaves home and when he/she comes back

Take your child's temperature every morning before leaving home

If the temperature is equal to or higher than **37,5 °C**, don't send your child to school, contact your doctor and inform the school immediately

It may be good practice to take the temperature also when coming back home from school

Take your child's temperature every morning before leaving home

Don't send your child to school if he/she has symptoms of a respiratory illness (persistent cough, for instance) high temperature or loss/change in sense of smell and taste.

Call your doctor!

**Check that
the student has
all his/her school
equipment
and the face mask**

**To borrow books, pens and
other school material may
expose your child to the risk of
contracting the virus**

Make sure your child always has his/her face mask

The face mask must be always in perfect condition. Check it before going to school

Hand washing

Each room of the school will be equipped with hand sanitiser, but it is advisable to have your own sanitiser and use it on public transport and before entering school

Be collaborative with the school staff

Be always reachable!

In case of
emergency
the school
needs
to contact the family

Make sure the contact numbers you have given the school **are
UPDATED AND AVAILABLE.**

**Leave also name and number of a trusted person in case
you cannot come in person**

WE CAN DO THIS TOGETHER!

USEFUL TELEPHONE NUMBERS
